Milling

Wide range of hammermills.
Easy repair and maintenance.
Low running costs.

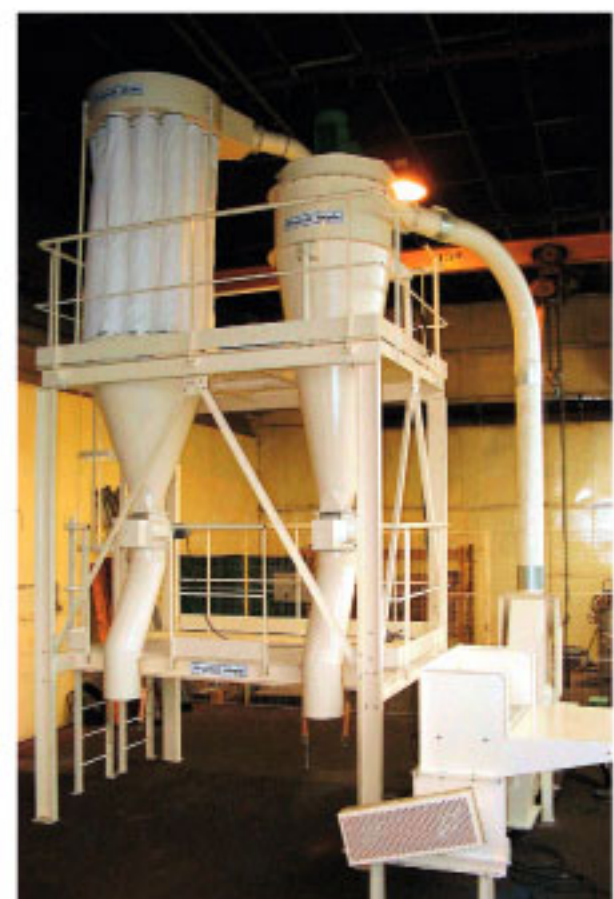

Grinding and mixing systems for animal feed

Roll crusher bodies

Fodder grinder for dehydrated fodders, wood scalpings or chips

Grinding systems

The services

After sales service
 Qualified and trained technicians
 Guaranty of original components
 Competitive prices and short lead times

Spare parts

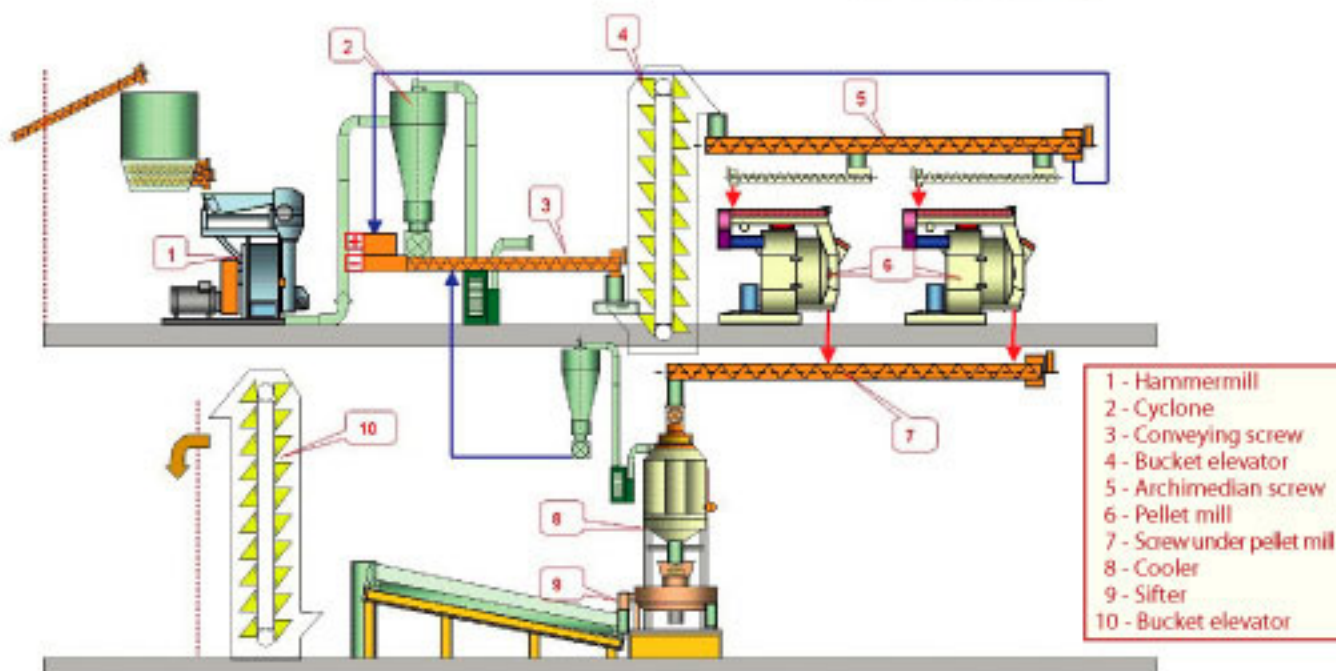

Pelletising mills dies

Installation follow-up from commissioning
 Permanent awareness through regular visits
 Yearly plans of machine inspection
 Appropriate preventive maintenance contracts

Rollers shells

The company

Since its creation in 1951, the industrial company PROMILL STOLZ, has been developing pelletising, milling and mixing technologies.

As an affiliate of STOLZ SEQUIPAG (200 employees), PROMILL STOLZ provides reliability and commitment from a large group (turnover M€ 40) in the design and follow-up of projects.

As a turnkey contractor, PROMILL STOLZ is now the business partner of a large national and international clientele, in the setting up of complete units (25% of the turnover is dedicated to export).

As your requirements are our concern, PROMILL STOLZ puts together its wide range of assessment and experimentation methods in order to provide the most appropriate solution, in compliance with required technological, economical and environmental requirements.

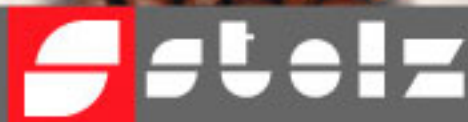

PROMILL STOLZ is the only company in it's field to manufacture 100% of mechanical components that constitute its products within its premises at Serville (80 km from Paris). Benefits are numerous :

- Responsiveness and flexibility in manufacturing
- Consistency in quality
- Continuous improvement of its products
- high availability of stock in our warehouse

Main fields of expertise :

- Dehydration of cattle fodder (alfalfa, straw,...),
- Sugar beet and sugar cane refineries,
- Animal nutrition,
- Wood as energy,
- Offal,
- Crushing plants,
- Distilleries,
- Starch plants,
- Spice plants,
- Medical plants
